DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 15-33 drawn to treating IGT and Type II diabetes in a patient, classified in class 514, subclass 3.
 - II. Claims 8-14, 34-58 drawn to treating conditions associated with IFG in a patient, classified in class 514, subclass 3.

2. The inventions are independent or distinct, each from the other because:

Inventions Group I-II are directed to related processes. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, the population of patients with IGT, IFG and Type II diabetes do not overlap in scope.

Patients with fasting glucose above 7 mM are diagnosed with having Type II diabetes, whereas individuals with fasting blood sugar between 6.1-6.9 mM are diagnosed with impaired fasting glucose (IFG). Additionally, the treatment methods associated with each are distinct based on the distinct population of the disease condition.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
